

# PERMA GROOMER SPROCKETS

## RECOVERED SPROCKETS

Over 30 years experience in polymers allows Perma Groomer to custom tailor urethane compounds to suit specific needs. The industry leading experience means that you can count on sprockets recovered with premium quality urethane that is specifically engineered to perform the rugged operations required in and around ski areas. We offer rapid turnaround, usually 2 weeks, to recover customer's cores and stock a large quantity of recovered factory sprockets for immediate shipment to satisfy customer needs.

- LMC
- Tucker
- Prinoth
- Bombardier
- Kassbohrer
- Pisten-Bully

## SOLID URETHANE SPROCKETS

In addition to core recovering, Perma Groomer also offers solid urethane sprockets. Each is made from high quality, specially selected urethane and is precisely engineered to fit Bombie, Muskeg, and Bombardier J5 sidewalk blowers.

Tucker long and short tooth sprockets are recovered over existing steel cores.

## MAGNUM CORE SPROCKETS

Perma Groomer produces "Magnum Core" heavy duty aluminum core sprockets for Pisten Bully 200-280 and Bombardier 275, 350, 400 and 2000 groomers. A Magnum Core sprocket for the Pisten Bully 300, 330 is also available. These extra strength sprockets have a larger, wider foundation designed to keep pace with the increased horsepower and weight of modern grooming vehicles. The cores are made of 319 heat treated aluminum and are CNC machined for precision fit. They feature the new wrap-a-round style abrasion resistant urethane coverings. Magnum Core sprockets set the new industry standard for strength, performance and endurance. They are in stock and available for immediate shipment.
