

PERMATHANE*Custom Molded Urethanes*

SALT & SAND SPINNERS

INTEGRAL HUB REPLACEMENT SPINNERS

Offers the latest technology in spinner design. These spinners are lightweight with direct fit to the customer's motor shaft with no hub required.

ADVANTAGES:

- Closed center sections eliminate "cross fire" of the product being spread that can sandblast a truck or sander box.
- Direct mounting eliminates the metal hub so there is no frozen product build up on the spinner.
- Straight fins allow for either clockwise or counter clockwise rotation for the best coverage of product per ton.
- Lightweight, high tensile strength compound provides unsurpassed wear.

20" Integral Hub Spinner

FIXED FIN REPLACEMENT SPINNERS

These replacement spinners offer the user an economical alternative to steel spinners. Permathane spinners will outlast the steel spinners several times over while extending the life of the hydraulic drive motors due to high resilience and impact resistance.

ADVANTAGES:

- Mounting to fit most makes and models.
- Product being spread will not freeze to the Permathane disc.
- High abrasion resistance.
- Highly visible red color.
- Will not rust or corrode.
- Available in clockwise or counter clockwise patterns.
- Curved or straight fin.

20" Fixed Fin Replacement Spinner

REPLACEMENT FIN SPINNERS

The replaceable fin spinner offers the flexibility of straight or curved fins for one base disk. These are specialized units used by many highway departments and municipalities. Replacement fins are available in both straight and curved fins as individual items for customer convenience. The complete spinners are available in a full range of sizes from 12" to 24".
